

Run Client Work, Projects, And Team Operations From One Calm Hub.

TriCord helps small businesses and startups keep conversations, tasks, knowledge, attendance records, employee records, payroll preparation notes, and reports organized in one place.

TriCord is a collaboration and business productivity tool. Workforce modules are optional recordkeeping tools. TriCord is not a payroll processor, tax advisor, legal advisor, HR consultant, or compliance service. Customers remain responsible for complying with applicable laws.

TriCord	Hub: CarePro VA	Discussion
Active Feed Tasks Knowledge Workforce	Open Posts 5 Knowledge 3 Open Tasks 8 Client Launch SOP Assign follow-up work from the discussion.	@Jamie please review. #email to: client@example.com subj: Update We will send the checklist today.

Plan	Best For	Included Capacity
Free	Individuals and very small teams testing the workflow.	1 owned Hub, 10 Rooms, 1 GB storage, 90 days searchable history.
Standard Hub	Teams that need one shared place to operate.	\$29/month or \$290/year. Up to 25 employees, 25 mailboxes, 25 GB storage, unlimited rooms, messages, tasks, CRM, recruitment, knowledge base, and attendance.
Custom	Organizations with more than 25 employees or specialized needs.	Contact TriCord for capacity, implementation, security, and support requirements.

1. What TriCord Is

TriCord is built around focused posts inside Rooms. A post keeps the original context, replies, files, mentions, task assignments, and outcomes together so important work does not disappear into scattered chat.

Active Feed Create focused posts, discuss work, mention teammates, attach files, forward selected messages, and archive outcomes.	Tasks Use board, list, and calendar views to track ownership, priority, status, and due dates.	Knowledge Base Save guides, FAQs, SOPs, troubleshooting steps, and best practices.
Workforce Optional attendance, employee records, payroll preparation, and attendance reports for recordkeeping.	Admin Owners manage users, roles, permissions, invites, Rooms, billing, and Hub settings.	Settings Manage profile, personalization, notifications, subscription, and connected mailboxes.

Recommended Daily Flow

Step	Action	Why It Matters
1	Choose the right Room.	Keeps client, department, and process context separated.
2	Create or open a focused post.	Prevents work from disappearing in scattered chat.
3	Discuss with context.	Replies, files, reactions, and email context stay attached to the topic.
4	Assign tasks.	Every follow-up can have an owner, status, priority, and due date.
5	Save reusable answers.	Turn repeated explanations into knowledge articles or SOPs.

2. Navigation And Rooms

- Use the sidebar to switch between Active Feed, Tasks, Knowledge, optional Workforce tools, Admin, Rooms, and account settings.
- Rooms separate work by client, team, department, project, or process.
- Owners and permitted Admins can create, rename, sort, pin, move, and delete Rooms. Members may manage Rooms they created when permissions allow.
- The room list can be compacted to show only Room names when you want a denser sidebar.
- On mobile, use the menu and side-panel controls to move between navigation, the feed, and the discussion panel.

Best Practice

Create fewer Rooms at first. Add Rooms when a topic needs its own repeatable space, such as Sales, HR, Client Support, Operations, or a major client account.

3. Active Feed And Discussions

- Create posts for updates, decisions, questions, client work, internal handoffs, or recurring workflows.
- Click a post to open its discussion panel. Replies stay attached to the original topic.
- Press Enter to send a chat reply. Press Alt+Enter to insert a new line.
- Use @ to mention Hub members. Mentions are highlighted with the Hub accent color.
- Use message actions to reply, copy, react, forward inside TriCord, edit your message when allowed, or delete when permitted.
- Files up to 20 MB can be attached. Larger files should be shared with a secure cloud storage link.

Draft Safety

TriCord keeps unsent text as drafts where supported so users can switch tabs or apps without losing work.

4. Email From Discussions

Email features are available for subscribed Hubs. Each user connects their own Gmail or Microsoft 365 mailbox in Settings. TriCord sends through the connected mailbox, stores tokens encrypted, and never asks users for API keys or passwords.

Important: @ is only for mentioning people in TriCord. Email sending uses #email or #mail.

Command Syntax

Line	Example	Required
1	#email	Yes. #mail also works.
2	to: client@example.com	Yes. One primary recipient.
3	cc: manager@example.com	Optional. Separate multiple addresses with comma or semicolon.
4	bcc: records@example.com	Optional.
5	subj: Weekly update	Optional. If omitted, TriCord uses the post title.
6	Blank line	Yes. Separates metadata from message body.
7+	Write the email message.	Yes.

Example

Discussion Reply

```
#email
to: client@example.com
cc: owner@example.com
subj: Friday update
```

Hello, here is the latest status from our team.

Email Guidance

- Connect Gmail or Microsoft 365 under Settings > Email Integrations before sending.
- Use email for external communication that should be recorded with the discussion context.
- Do not send regulated, confidential, or sensitive information unless your organization has permission and appropriate safeguards in place.

5. Tasks

- Board view organizes tasks by status such as To Do, In Progress, In Review, Done, and Canceled.
- List view is best for scanning many tasks with assignee, project, status, priority, and due date.
- Calendar view helps teams review workload by due date.
- All users can create and assign tasks when permitted. Owners and Admins manage records according to role permissions.
- Completed or canceled tasks can be archived to reduce clutter.

Task Hygiene

Practice	Recommendation
Ownership	Every task should have one clear assignee.
Priority	Use urgent sparingly so it keeps meaning.
Due Dates	Add due dates to commitments that affect clients, payroll, compliance, or launch timing.
Archiving	Archive done or canceled tasks after review.

6. Knowledge Base

- Create articles for SOPs, how-to guides, FAQs, best practices, troubleshooting, policies, and reusable answers.
- All roles can create knowledge articles when allowed. Owners and Admins manage edits and deletions.
- The TriCord User Guide appears as a built-in knowledge item for every plan.
- Use categories and clear titles so users can find answers without asking someone else.

Article Template

Section	Purpose
Summary	What this article helps the reader do.
Steps	Short ordered instructions.
Owner	Who maintains the procedure.
Last Reviewed	When the content was last checked.
Related Work	Links to Rooms, posts, tasks, or files.

7. Workforce Tools

Workforce tools are optional business productivity features for recordkeeping and organization. TriCord is not a payroll processor, tax advisor, legal advisor, HR consulting service, or compliance service.

Module	Purpose	Important Note
Attendance	Clock in/out, review entries, and manage employee-specific attendance policies.	Owners control policy settings. Admins need explicit permission for attendance settings or corrections.
Employee Records	Organize profile details, leave approvals, documents, performance notes, and compensation records.	Sensitive fields should only be collected when your organization has a lawful business reason.
Payroll Preparation	Prepare owner-reviewed draft summaries from attendance and compensation records.	Drafts must be reviewed by your payroll provider, accountant, tax professional, or advisor before use.
Attendance Reports	Review attendance summaries, holidays, leave, late arrivals, absences, and totals.	Reports depend on the data your organization enters and verifies.

8. Admin, Roles, And Permissions

Owners manage billing, Hubs, people, Rooms, permissions, and sensitive settings. Admins only see features they have been granted. Members and Guests see only the tools relevant to their role.

Role	Typical Access
Owner	Full Hub control, billing, people and roles, permissions, subscription, and sensitive records.
Admin	Only granted capabilities, such as managing Rooms, knowledge, leave approvals, attendance, payroll preparation, or reports.
Member	Work in assigned Rooms, create posts, reply, complete tasks, view permitted records, and submit requests.
Guest	Limited collaboration access based on Hub and Room permissions.

Security Practices

- Give each user the minimum role and capability they need.
- Review Admin capabilities regularly.
- Do not share accounts. Invite each person with their own email address.
- Use strong passwords and protect access to email accounts used for sign-in and connected mailboxes.

9. Plans And Limits

Capability	Free	Standard Hub	Custom
Owned Hubs	1	1 Standard Hub	Custom
Employees	Up to 10 for trial/basic collaboration	Up to 25 employees	More than 25 by quote
Mailboxes	Not included	25 connected mailboxes	Custom
Storage	1 GB	25 GB	Custom
Rooms	10	Unlimited	Unlimited
Messages	90 days searchable history	Unlimited	Custom retention
Tasks	Included	Unlimited	Advanced needs by quote
Knowledge Base	Included	Unlimited	Custom
Attendance	Basic / limited	Unlimited attendance tools	Custom
Email Features	Not included	Connected Gmail/Microsoft 365 sending	Custom
Support	Help center	Email support	Custom onboarding and support

IMPORTANT

10. Privacy, Compliance, And Data Safety

- Only collect information your organization needs for a legitimate business purpose.
- Give employees and users any required notices before collecting GPS, IP address, device information, selfie verification, compensation information, identity numbers, or other sensitive data.
- Do not store protected health information, payment card numbers, bank login credentials, or regulated data unless TriCord has expressly agreed in writing to support that data type.
- Customers remain responsible for complying with labor, payroll, tax, privacy, employment, industry, and local laws.
- Review your Terms, Privacy Policy, employee notices, and internal policies with qualified professionals.

Frequently Asked Questions

Question	Answer
Can one email belong to multiple Hubs?	Yes. A user can be a Member in one Hub and an Owner in another because roles are assigned per Hub.
Does TriCord process payroll?	No. TriCord helps organize payroll preparation records and draft summaries. It does not move money, file taxes, or determine compliance.
Can I mention teammates and send email in the same discussion?	Yes. Use @name for Hub mentions. Use #email or #mail at the start of a reply when sending an external email.
Are email features included on Free?	No. Connected mailbox sending is a subscribed Hub feature.
